EDUCATION

Rutgers University, School of Arts and Sciences | New Brunswick, NJ

January 2027

Bachelor of Science in **Computer Science** | Honors College | Minor: Psychology

GPA: 3.85

Relevant Courses: Data Structures, Computer Architecture, Discrete Structures, Software Methodology, Algorithms, Systems Programming, Data Management for Data Science, Linear Algebra

Publication: *Personalization & Privacy: The Give & Take Paradox*, analyzing algorithmic filtering & data practices through a privacy lens- Presented at Rutgers University Research Writing Conference (April 2025)

SKILLS, CERTIFICATIONS, & AWARDS

Programming Languages & Frameworks: Java, Python, JavaScript, C, HTML/CSS, React, Node.js, R/RStudio, Git, Figma

Tools & Technologies: Flask, Spring Boot, PostgreSQL, MongoDB, AWS, Pandas, TensorFlow, Selenium, Agile/Scrum, Linux

Certifications: [AWS Certified Solutions Architect-Associate](#), [Meta Back-End Developer Professional Certificate](#)

Awards: 1st Place Rutgers & Fiserv Hackathon (April 2025); JPMC Code for Good Participant (Oct 2025); HSF Scholar ('24, '25)

EXPERIENCE

Capital One | McLean, VA

June 2026- August 2026

Software Engineer Intern

- Engineered a multi-tenant RAG pipeline (Python, Qdrant, Pydantic) for an internal Q&A platform, streamlining knowledge retrieval for 5+ engineering teams and saving 5 hours per engineer weekly (**\$18K in annual cost savings per user**)
- Scaled hybrid search across 50K+ document chunks to a P90 latency under 3.5 seconds by architecting unified, async Python interfaces for four hot-swappable retrieval strategies
- Unblocked deployments & reduced container image size by 30% by replacing external model dependency with a lightweight, custom-built deterministic tokenizer

Colgate-Palmolive | Piscataway, NJ

February 2026- May 2026

Software Developer Intern, DevOps/Platform Engineering Team

- Engineered a Node.js data pipeline to scale Snowflake-to-Sheets ingestion by 20x (up to 20M cells), bypassing 50MB architectural limits via a custom Gzip binary transport protocol and manual decompression
- Reduced latency from 30 to 5 minutes for 250+ users by migrating to Advanced Sheets API & cutting memory overhead by 40%
- Implemented dynamic resource management for Snowflake warehouse selection, enabling compute optimization and cost control

Hawl Technologies, LLC (Startup) | Remote

July 2025- December 2025

Software Engineer Intern, Data Team Lead

- Led data team of 3 interns; collaborated with UX, backend, & CEO to ship Chrome extension powering AI memory across LLMs
- Re-factored platform manager with CSP-safe pipelines & backfill, **reducing dropped messages by 95%**, enabling real-time sync

AI4ALL | Remote

May 2025- October 2025

Software Engineering Summer Fellow

- Collaborated with 5 engineers to build ML pipeline processing **9K+ records**, with **$R^2 = 0.68$** to surface key startup success drivers

PROJECTS

[Out of the Loop - AI-Powered News Sentiment Platform](#)

June 2025- Present

Technologies: Python, Flask, SQLAlchemy, BeautifulSoup, Selenium, scikit-learn, Hugging Face Transformers, Postman

- Built a Chrome extension with 20+ active users based on research in algorithmic bias, surfacing news sentiment and "you-loops" to promote awareness to users' reading patterns
- Re-architected infrastructure for cost optimization, migrating a monolithic AWS deployment (EC2, RDS, S3) to a serverless, free-tier stack using Neon DB and Hugging Face, maintaining CI/CD pipelines and Sentry monitoring
- Developed a custom sentiment analysis engine by fine-tuning a **BERT regression model**, achieving a **0.14 MAE** on a news dataset and enabling **zero-cost, real-time analysis by eliminating external API dependencies**

AI-Powered TikTok Market Research Optimizer

June 2025- Present

Technologies: Python, Flask, Playwright, Pandas, NLTK, Google Gemini AI, JavaScript, Chart.js, HTML/CSS

- Built full-stack app for personal barber business, automating TikTok trend research, cutting analysis from hours to **under 2 mins**

AFFILIATIONS

ColorStack (Outreach Chair), CodePath, Code2040, Propel2Excel, Society of Hispanic Professional Engineers, Rutgers Catholic
